SUMMARY

Third-year Computer Science student (Graduating 2027) at the University of Nairobi with hands-on experience building data pipelines, scraping systems, and backend APIs. Seeking structured industry exposure through internship opportunities to deepen software engineering fundamentals and contribute to reliable, scalable systems.

TECHNICAL SKILLS

- Python, JavaScript
- Algorithms & Data Structures
- SQL
- Data Processing & ETL Workflows

- Machine Learning Fundamentals
- Numpy, Pandas
- Scikit-learn
- Pytorch, Tensorflow

EXPERIENCE

Instructor (Contract) | GOMYCODE Kenya

2024 – Present

- Mentor students in Data Science and Web Development fundamentals.
- Prepare structured learning materials and practical exercises.
- Support learners in debugging and implementing projects.

Independent Developer (Contract-Based)

2020 – Present

- Built content extraction pipelines using Python-based tooling.
- Designed structured scraping workflows for reliable data collection.
- Developed backend APIs and ETL processes for analytics systems.
- Delivered contract-based technical solutions with documented outcomes.

EDUCATION

University of Nairobi

BSc. Computer Science (Expected Graduation: 2027)

LANGUAGES

- English: Fluent
- Swahili: Native
